## DriverActive Links

### Giving specific lesson preparation and revision links

If you want your customers to prepare and revise you need to *be specific*. If you know that they can get home practise, you will ideally be outlining exactly what they should practise (and involve the parent/supervisor).

The links below are to specific subjects in DriverActive – text, email, whatsapp, PM or whatever to give the links to your customers during your lesson debrief and then quiz them about the content at the start of the following lesson.

### Basic Skills

Cockpit Drill
